# **Bara Sameeh Barakat** Full-Stack Web Developer

**Email:** barabarakat700@gmail.com **Website:** https://bara-barakat.net

🖬 Bara Barakat 🥒 Phone: (+962) 785104605 🏫 Address: Amman, Jordan

## **Professional Summary**

I am Bara Sameeh Barakat, Full-Stack Web Developer with expertise in creating responsive, user-friendly interfaces and scalable, dynamic web applications. Since transitioning to freelancing in 2024, I've honed my ability to translate design concepts into functional websites, specializing in Figma-to-code workflows. I am proficient in both front-end technologies (React) and back-end frameworks (PHP, SQL), with a focus on building high-performance, maintainable code. My experience includes optimizing web performance, implementing RESTful APIs, and following SEO best practices to enhance site visibility. I am adept at working in Agile environments, meeting deadlines, and delivering high-quality solutions under pressure.

# Work Experience

## Full Stack Developer | Clever Mind POB ICT, Amman 2024 – 2025 January (1 years)

As a Full Stack Developer at Clever Mind POB ICT, I have contributed to the development of various dynamic websites and web applications, working on both front-end and back-end tasks. My role involved developing IT company websites, gym websites, e-commerce platforms, and multi-vendor e-commerce sites. Key responsibilities and achievements include:

- Developed and maintained responsive web templates for both client-facing websites and admin portals, ensuring they were user-friendly and optimized for various devices.
- **Built and integrated APIs** to enable dynamic, data-driven features and interactions between the front-end and back-end systems, improving the overall functionality of web applications.
- Worked with PHP and MySQL to develop back-end systems, ensuring seamless functionality and efficient database management.
- Created fully functional admin portals for websites and mobile apps, allowing clients to manage and monitor their content with ease.
- Collaborated with cross-functional teams to understand and implement the requirements outlined in Product Requirement Documents (PRD) and Product Design Documents (PDD), ensuring that development aligned with client needs.
- **Debugged and fixed issues** to ensure optimal website performance, contributing to a better user experience and fewer disruptions.
- Maintained and updated websites with new features, content, and security updates, ensuring sites remained current and secure.
- Utilized front-end technologies (HTML, CSS, JavaScript, jQuery) to develop interactive, visually appealing, and responsive user interfaces.
- **Demonstrated a strong understanding of IT principles** to implement best practices in web development and IT systems, ensuring scalable and secure applications.

Key Technologies and Tools:

- Languages/Technologies: PHP, JavaScript (jQuery), HTML5, CSS3
- Frameworks & Tools: APIs, CRUD operations, Responsive Design, MySQL
- Version Control: Git, GitHub
- Other: Database management, Web Optimization, Bug Fixing

**Education** All certificates can be viewed on my website.

Harvard University: CS50: Introduction to Computer Science, 2024.

Alison: IT Management – Software and Databases, 2024.

Simpli: Software Development, 2024

# Courses

Microsoft: Front End Web Development, 2024.

Meta: Front-End Development, 2024.

IBM: Front-End Development, 2024.

Mind Luster: Advanced JavaScript Programming, 2024

Castle Academy: Problem Solving Course, 2024

# Interests

- Microsoft : Cybersecurity: Authentication and Authorization, 2024
- Microsoft : Implementing Row-Level Security, 2024
- Linkedin Learning : Creating Secure Websites, 2024
- Great Learning : UI / UX, 2024
- Stanford : Introduction to internet of Things, 2024
- Edraak platform : Agile Methodology, 2024
- Atlassian (Coursera) : Agile With Atlassian Jira, 2024

# Soft Skills

- Quality Assurance (QA) fundamentals
- Basics of Agile methodologies
- Jira Software
  - Critical Thinking & Problem Solving
  - Time Management & Prioritization
  - Team Collaboration & Leadership
  - Effective Communication
  - Attention to Detail & Quality Assurance
  - Self-Motivation & Continuous Learning

# **Events and Activities**

#### **Hackathon Participant**

Almond Coffee House, Jordan 2024

- Actively participated in a small-scale hackathon where teams of 5 members brainstormed and developed ideas aimed at benefiting Jordan.
- Collaborated with **Tariq Al-Awza**, a Senior Developer at Apple with over 17 years of experience in technology, gaining valuable industry insights.
- Contributed significantly to brainstorming sessions and the development of innovative ideas addressing real-world challenges in Jordan.

## **Technical Skills**

- Languages: HTML5, CSS3, JavaScript, PHP, SQL
- Frameworks & Libraries: React, Redux, Bootstrap, Tailwind, Sass, JQuery
- Tools: Git, GitHub, NPM, Postman
- Other Technologies: Restful APIs, Pug

# Projects

#### Portfolio

• Built an interactive, responsive portfolio website using **React**. Integrated dynamic content loading and optimized for fast loading times and smooth transitions. The website showcases my front-end development skills with a focus on UI/UX design.

#### Zonan: A Comprehensive Multi-Vendor Platform

Zonan is a feature-rich multi-vendor platform. It enables businesses and individuals to create and manage online stores effortlessly within a unified and user-friendly ecosystem.

## **Key Features**

**Multi-Vendor Support:** Vendors can create and manage their stores independently, showcasing their products to a broad audience.

User-Friendly Interface: A modern, intuitive design ensures a seamless experience for both vendors and customers.

**Comprehensive Dashboard:** Both admins and vendors have access to powerful dashboards for managing content, orders, and products efficiently.

#### **Technologies Used:**

PHP: To build a scalable and robust backend system.

JavaScript: For interactive and dynamic user experiences.

MySQL: To securely store and manage structured data.

## Feane - E-commerce Platform for a Burger Restaurant

- **Project Description**: Developed a full-featured e-commerce platform for a burger restaurant, including a customer-facing website and a comprehensive admin dashboard for managing orders, users, and products.
- Role: Full development and implementation of the platform.
- Technologies Used:
  - Frontend: HTML, CSS, Bootstrap, JavaScript
  - Backend: PHP
    - Database: MySQL
- Key Features:
  - $\circ$   $\,$  User authentication system for both customers and administrators.
  - Interactive menu browsing with shopping cart functionality.
  - Admin dashboard for managing content.
  - Fully responsive design optimized for various devices.

#### Recipes

• Developed a responsive restaurant dashboard allowing users to manage menu items, orders, and customer reviews. Integrated real-time data and customizable widgets to improve user engagement.

#### - Dashboard Features

• User-Friendly Interface: intuitive design, making it easy for users to discover features.

• Real-Time Data Visualization: Patrons can view real-time updates.

• Customizable Widgets: Users can tailor their dashboard experience by adding or removing widgets based on their preferences, enhancing personalization.

Technologies Used: Bootstrap, JavaScript, PHP, SQL.

#### Weather App

• Created a weather application that provides real-time updates for selected cities using **JavaScript** and **API integration**.

#### **Currency Conversion Tool**

• Developed a tool for converting amounts between different currencies based on real-time exchange rates relative to USD, utilizing **JavaScript** and **API integration**.

#### Product Management System (CRUDS)

• Designed and implemented a web-based interface for basic data operations (Create, Read, Update, Delete, Search) using **JavaScript**.
